CNS to Produce 21st Century Facilities & Business Integration Network Performance Specification for one of London's most Prestigious Buildings Heron Towers

CNS has been contracted to produce a 21st Century Facilities & Business Integration network performance specification for the prestigious Heron Towers development.

This development is set in London's City business district specifically 110, Bishops Gate. It is set to add to the dramatic skyline of this area with an impressive glass cladded building towering some 242 metres, 46 floors and 63,000 sq m. It will provide the Square Mile with much needed office space in addition to a new public on the top floor offering stunning views over the city.

The remit of the client is to create a state of the art 21st century building not just in construction but in building systems and their integration, in order to deliver ***“Strategy for most efficient use of equipment to meet operational needs of business”*** based upon Open/De-facto Standards.
