

Control Network Solutions

OPENING NETWORK FRONTIERS

Control Network Solutions partner with Tyrrell Systems to deliver Tridium's Niagara® AX technology platform to meet the integration demands of Britain's largest out of town shopping centre.

This first phase of work will provide the platform for the owners to explore and exploit all the benefits of M2M, Convergent Technology, CCRE and Smart Services to:-

- ❖ reduce and better manage Operational costs
- ❖ provide Revenue generating additional services to their clients
- ❖ improving the experience of both workers and visitors
- ❖ support Green and Sustainability objectives

Already the first phase ticks the sustainability box by the reuse of existing installed controls products thereby extending their operational life.
