

New LonWorks® Fibre Products Launched

CNS is pleased to announce that it is ready to accept orders for the soon to be released new replacement products.

This follows the ending of LonFibre product manufacturing earlier this year by CBL®/Quasar Technology®

We have focussed on the two most popular LonFibre products sold around the world -

LonFibre SMX Transceiver

LonFibre Intelligent Routers

These two products whilst being drop in replacements for the old CBL/Quasar products have been completely redesigned and updated.

The single most significant change is to the laser diode technology used which now offers up to 80Km range.

Available with both Multi Mode and Single Mode SC connector 1310/1550nm lasers allowing full duplex communications over a single fibre core.
