# The Latest eNode™IV/GR4 Firmware Just Got Better

**The latest release of eNode™IV firmware marks a major upgrade in performance and features in this world class leading Lon/IP 852 Router product.**

**Even before this latest firmware release the eNode™IV Lon/IP 852 router already led the field in innovation being the first to offer –**

- ◆ Twin Redundant mode and was the first to be deployed anywhere in the world with this feature which led to an award for the International Consultant involved.

- ◆ Lon/WiFi 852 integrated option

- ◆ Bridge Routing mode for IP852 traffic management

- ◆ "Flood" mode for seamless connectivity across IP without network management

- ◆ Smallest enclosure size

**Now this latest Release of firmware further improves performance and compatibility with Lon® IP 852 products, key highlights are –**

- ◆ Approved by Johnson Controls and added to their internal "e-Room" listing under both marketing names GR4 and eNode™IV.

- ◆ Supports LoyTec® Config Server and GesyTec® 852 IP devices.

- ◆ Improved interoperability with i.LON® Config Server and LNS®

- ◆ Now works with Firefox 3.x+ and Internet Explorer 8 in Addition to Safari 4.x, also verified works with Opera 10.x, and Chrome 3.x.
