

Italian elitedali Certified Partners (CEP[™]) and Honeywell CentraLine, Italy implement intelligent lighting control for multinational Tetra Pak[®], located in Modena.

Tetra Pak Intelligent Lighting Solution

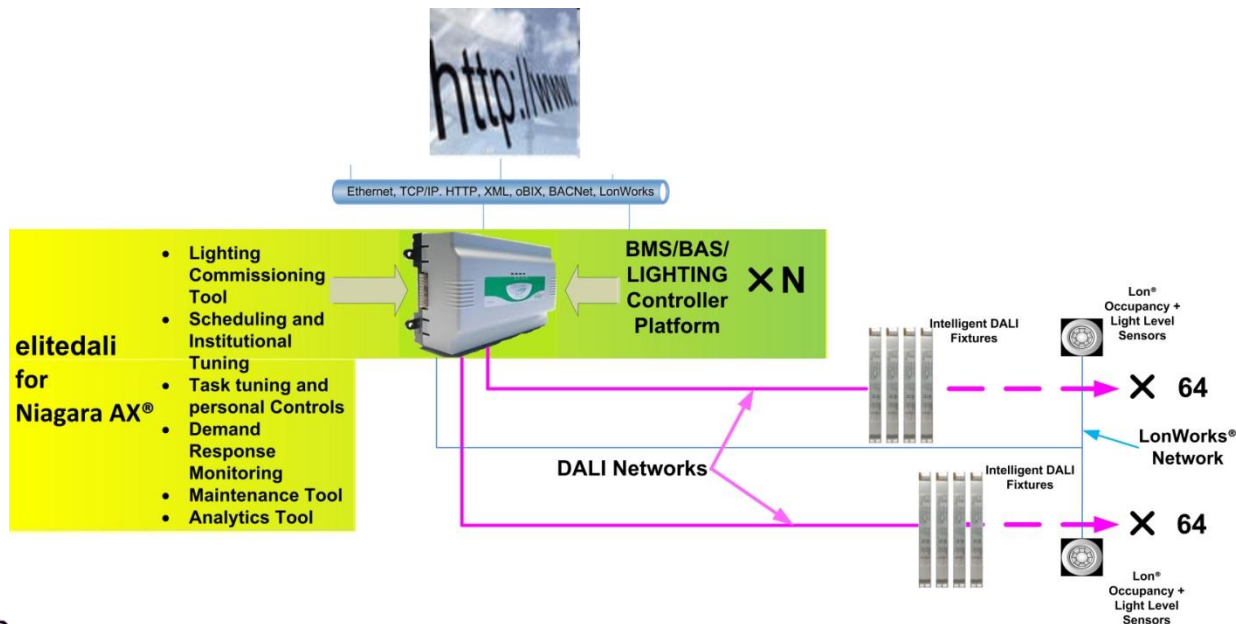

The Italian Certified elitedali Partners (CeP™), made up of the companies Tecnogest Verona and CentraLine by Honeywell Italy in conjunction with the CentraLine partner Sacir, have developed the first Italian project for the management of integrated intelligent lighting in the field of building automation using the AX elitedali solution of CNS (Control Network Solutions).

The project involves the renovation of an office floor at one of the Italian sites of the famous multinational Tetra Pak, located in Modena.

Tetra Pak Intelligent Lighting Solution Architecture

The system architecture uses a CentraLine^{AX} Hawk controller directly connected to the DALI[®] light fixtures in order to commission and manage automatically the ON/OFF and dimming of the lighting units based on the signals from presence and light sensors placed on an existing bus with LonWorks[®] communication.

The project is the latest in a series of revamping activities involving building automation systems geared at energy saving, a field in which CentraLine by Honeywell and its team of partners excel.

Intelligent lighting through CentraLine^{AX} integration with CNS elitedali further expands the range of energy saving solutions made available to customers who rely on the experience of the CentraLine partners.

About the Centraline Honeywell Italian Team

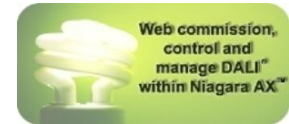

Honeywell Centraline and CNS wish to thank the Tecnogest and Sacir CeP partners, represented by the Technicians Roberto Bianchi and Alberto Marchesini, for the execution of the project, as well as Tetra Pak, represented by the Facility Manager, for its proactive cooperation.
