

## *How the World's smallest Lon/IP 852 Router compares with Echelon's iLon 600*

**eNode™ IV Lon/IP** is a **drop in replacement** for the **i.Lon 600** offering **lower cost ,smaller package and lower power consumption**

eNode™ IV the latest generation of this world class leading product for all Lon-Works IP 852 applications. To view the latest datasheets click [here](#) .

Key differences compared with the i.LON 600 are;

- ◆ **Lowest cost** — save hundreds on each unit; be more competitive; be more profitable
- ◆ **Best PPS/K on the market** — better PPS/K than even a LON/IP router plus four-port FTT-10 switch
- ◆ **WiFi or Ethernet** — only router with the either interface option
- ◆ **Smallest size** — minimize space usage

- ◆ **Web browser user interface** — convenient remote configuration
- ◆ **Normal or manual mode configuration** — most flexible configuration options
- ◆ **Totally transparent "flood" mode** — enables invisible bridging between LON channels
- ◆ **Serial transaction mode** — support for low bandwidth IP channels
- ◆ **Optional bridging router mode** — for traffic isolation in large 852 installations
- ◆ **Optional redundant twin mode** — for high availability applications
- ◆ **Lowest Carbon footprint** - smaller and lighter package plus lower component count and power consumption, low component count
