

PRESS RELEASE

XX October 2015

CNS'S INNOVATIVE CONTROLS SOLUTIONS TO BE DEMONSTRATED AT HONG KONG'S INTERNATIONAL LIGHTING FAIR

Fulham Company's stand at the Hong Kong International Light Fair is to demonstrate smart, web-based lighting controls by Control Network Solutions.

Attracting exhibitors from 38 countries, the show which runs 27-30th October comprises of five distinct zones; the LED and green lighting zone, the hall of Aurora, smart lighting and solutions zone, advertising lighting zone as well as the household lighting zone and avenue of inspiration.

Mike Welch, Managing Director of Control Network Solutions, said: "Hong Kong's lighting sector is one of largest and most advanced in the world and the Hong Kong International Lighting Fair is the most revered lighting show in the Far East. We are delighted that Fulham invited us to exhibit alongside them and that our local representative, GLine Net, can be there on our behalf."

Russ Sharer, VP Global Marketing and Business Development at Fulham said, "We are excited with the potential for CNS software and Fulham lighting components. Through the combination of CNS's **elitedali**[™] and Fulham DALI drivers, buildings can dramatically reduce their lighting energy consumption and therefore, improve their energy efficiency."

Integrating into the leading Tridium Niagara building controls system, **elitedali** provides end-users with total control over their lighting, with access to live energy use data as well as choice of system integrator when considering the system's maintenance and operation.

Mike concludes, “By integrating into a building’s existing building control system, **elitedali** ensures a quick return on investment and by reducing the level of parasitic power consumed when the lights are off ensures a more energy efficient, smart building.”

GLine Net will be alongside Fulham Co Ltd on stand IC-C02 at Hong Kong International Light Fair, 27-30th October 2015, Hong Kong Convention and Exhibition Centre, 1 Expo Drive, Wanchai, Hong Kong.
