

## **“Olympic Gold” for System Integrator MML Sistemas, São Paulo Brazil, as they successfully become latest Certified **elitedali™** Partner (CeP™).**

We are pleased to announce Control Network Solutions’ (CNS) latest Certified **elitedali™** partner is MML Sistemas in São Paulo Brazil.

MML already has significant experience in the area of building automation based upon platforms that incorporate Tridium’s Niagara Framework®.

As a CeP MML, Sistemas will now also be able to deliver Niagara smart lighting projects with **elitedali** utilizing exactly the same building automation platform solutions.

Founded in 1986, MML Systems Ltd has been developing its knowledge and skill in the building automation and electronic security market, expanding its range of services and carrying out major projects throughout its national territory

With its headquarters in São Paulo and a branch in Curitiba, MML has a team of trained and specialized staff in various areas of the company's operations. This is its greatest asset: the knowledge base, which enables them to accurately diagnose, understand their needs and develop the most appropriate management tools for each client.

MML has more than 200 customers and many success stories. These success stories will now include delivering flexible intelligent lighting with full access to value data. We look forward very much to working with them.
