

Control Network Solutions

OPENING NETWORK FRONTIERS

***eLighting™* and Etavis AG helps to light up young minds at Schulhaus Neugasse Bazenhaid, Switzerland**

This is the latest Niagara AX™ building integration projects successfully completed incorporating the world's first entirely web based DALI® commissioning, control and management solution, ***eLighting™ for Niagara AX™***.

eLighting™ enabled the use of existing planned Niagara AX based platforms for building management to be directly connected to eight DALI networks comprising DALI ballasts, inverters and MultiSensors totalling 346 DALI devices. From within Niagara AX, Etavis AG, the Systems Integrator, was able to fully commission the DALI devices, implement complex automatic lighting control strategies and along with other building systems data, create a User Interface for the client.

The entire building had to meet local Swiss Minergie-standards and using DALI and lighting automation has helped towards this achievement for now and into the future. In addition to saving energy, ***eLighting™*** also enables the remote management and maintenance of the DALI lighting systems further reducing operational costs.

For more information please contact Roland Sutter at Etavis AG, email roland.sutter@etavis.ch or Mike Welch at Control Network Solutions, email mike@control-network-solutions.co.uk

eLighting™ is the trade mark of CNS's Niagara AX™ DALI® lighting commissioning, control and management products and solutions.
