

# Control Network Solutions

OPENING NETWORK FRONTIERS

## **Recruiting Now:** **Development Engineer position**

CNS is in the process of launching an exciting web Open Standards lighting control product range under the name **eLighting™ for Niagara AX**. This is the world's first fully integrated web package for commissioning, control, management and visualisation of DALI lighting networks directly from within Niagara AX, a globally recognised convergent technology platform in the building automation industry.

**eLighting** offers fully integrated lighting control and management with other BMS systems within Niagara offering scope to **save energy, address CO2 emissions, claim Enhanced Capital allowances, visually demonstrate Corporate Social Responsibility and meet European Building Directives.**

With the imminent release of Release 1.0 work is already in progress on Release 2.0 with plans for Release 3.0 and beyond. We now need to add talented individuals to our Engineering Team to support this innovative product and the on-going developments.

Initial reaction from around the world to **eLighting** has been very encouraging and this represents a key moment for the right individual to make their mark both nationally and internationally.
