

# Control Network Solutions

OPENING NETWORK FRONTIERS

## ***eLighting™ for Niagara AX™ helps lighten the load at N G Bailey's prestigious new Scottish regional office***

N G Bailey opens a state of the art 2000 m<sup>2</sup> Regional Centre for Scotland at Strathclyde called Solais House. Tim Checketts, Sales and Marketing Manager for Bailey Systems who were responsible for the integration of all the building systems including the automated DALI® lighting, stated after attending the official opening: *"it will be a brilliant building to work in, both the lighting and environment are just so perfect"*.

Bailey Systems, a Tridium Integrator, were able to commission and implement the required lighting control strategies including daylight harvesting using Control Networks Solutions Ltd's (CNS) ***eLighting™ for Niagara AX™*** which provides direct connectivity, commissioning, control and management of DALI lamps via Tridium's Convergent web based Niagara AX technology platform. ***eLighting*** also seamlessly integrates lighting with all the other building systems connected to Niagara AX platforms. The net result is that ***eLighting*** contributes to the user experience, energy efficiency and lower maintenance costs of the entire building.

The benefits of lighting control and management fully integrated with the iBMS using ***eLighting for Niagara AX*** also contributed to this building's BREEAM rating of "Excellent" and its A-rated Energy Performance Certificate, the first in Scotland.

For details please contact either Tim Checketts on +44 (0) 113 222 3656 or [tim.checketts@ngbailey.co.uk](mailto:tim.checketts@ngbailey.co.uk) or Mike Welch Control Network Solutions Ltd (CNS) on +44
